

Instructions:

Includes: 1 digital remote display, 1 switch box, 1 3-foot data cable, and 1 14-foot Data cable.

Installation

1. Disconnect exiting Display from EMS and connect to the switch box input
2. Connect three-foot cable to switch box output, and existing (mounted) display.
3. Connect new 14-foot cable to last switch box output and route cable to desired location and connect to new Display.
4. You can only read one display at a time so when the switch is in one direction the corresponding display will light and switch box LED will light.

Note only use enclosed data cable regular phone cable will not work.

Warranty is for three years and is the same as your EMS warranty.
